PROFESSIONAL SUMMARY

Frontend-focused Software Engineer with 3 years of hands-on experience building responsive and interactive web applications using React and modern JavaScript. Skilled in designing scalable user interfaces, integrating REST APIs, managing application state, and implementing backend-connected features using Firebase. Passionate about solving real-world problems through clean, maintainable code and modern frontend architecture. Currently expanding programming knowledge through Python-based projects and software engineering fundamentals.

TECHNICAL SKILLS

Programming & Markup

JavaScript (ES6+) • Python • HTML5 • CSS3 • TypeScript (Familiar)

Frontend Development

React.js • React Router • Responsive Design • Component-Based Architecture • State Management (Hooks & Context)

Backend & Integration

REST API Integration • Firebase (Authentication, Firestore, Hosting) • JSON Data Handling • Form Handling & Validation • CRUD Concepts • Client–Server Flow

Tools & Frameworks

Git & GitHub • Bootstrap • Tailwind CSS • SASS/SCSS • Styled Components • WordPress (Basic)

Deployment & Platforms

Vercel • Firebase Hosting • GitHub Pages

Soft Skills

Problem Solving • Team Collaboration • Communication • Critical Thinking • Adaptability

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Venture Tribe – Lagos, Nigeria

Oct 2024 – Dec 2024

- Developed scalable frontend features using React and modern JavaScript
- Integrated API-driven data into dynamic UI components
- Built reusable frontend structures to improve maintainability and development speed
- Collaborated with designers and developers to deliver user-focused product features

- Assisted in debugging issues and improving application performance across devices
-

Software Development Trainee

NIIT – National Institute of Information Technology, Lagos

Aug 2023 – Nov 2024

- Built multiple responsive web applications using React, JavaScript, HTML, CSS, and API integration
 - Practiced component architecture, state management, and frontend-backend interaction
 - Developed projects simulating real-world software development workflows
 - Focused on writing clean, reusable, and maintainable code
 - Strengthened foundational programming and problem-solving skills through Python practice
-

PROJECT EXPERIENCE

InviteWave – Event Management Web Application

Tech Stack: React, JavaScript, CSS, React Router, Firebase

 **Live Demo:** invitewave.events

 **GitHub:** <http://github.com/Adebayo114>

- Developed an event platform where users can create and manage events
- Integrated Firebase Authentication for secure user-based access
- Structured event data handling using Firestore backend logic
- Implemented form validation and dynamic event interaction features
- Designed responsive layouts optimized for mobile and desktop devices

- Built reusable frontend components and client-side routing workflows
-

Dyna Wishes – Personalized Greeting Web Application

Tech Stack: React, JavaScript, CSS, Vercel

 **Live Demo:** dyna-wishes-dxutokww1-adebayo114s-projects.vercel.app

 **GitHub:** <http://github.com/Adebayo114>

- Developed a personalized greeting application with dynamic user-generated content
 - Implemented form handling and URL-based routing for customized greeting pages
 - Built responsive UI layouts with themed backgrounds and interactive user experience
 - Added social sharing functionality across multiple platforms
 - Structured reusable React components and smooth frontend interaction flows
-

Dyna Quiz – Interactive Learning Web App

Tech Stack: React, JavaScript, CSS

 **Live Demo:** <https://dyna-quiz-hnykegtkf-adebayo114s-projects.vercel.app>

 **GitHub:** github.com/Adebayo114

- Developed a dynamic quiz application with multiple difficulty levels and programming categories
 - Implemented state management for question flow, score tracking, and user interactions
 - Designed a responsive and user-friendly interface for smooth navigation across devices
 - Structured reusable frontend components for scalability and maintainability
-

LineIQ – Hairline Symmetry Checker (Prototype)

Tech Stack: Python

 [GitHub: github.com/Adebayo114](https://github.com/Adebayo114)

- Built a console-based Python application for analyzing hairline symmetry measurements
 - Implemented comparison and balance-detection logic using conditional statements
 - Processed user input dynamically to determine symmetry outcomes
 - Applied foundational Python concepts including variables, logic flow, and user interaction
-

Smooth Laundry – Service Booking Website

Tech Stack: React, JavaScript, CSS

 [Live Demo: smooth-laundry-bfki.vercel.app](https://smooth-laundry-bfki.vercel.app)

 [GitHub: github.com/Adebayo114](https://github.com/Adebayo114)

- Developed a responsive service-based web application
 - Built reusable frontend components and intuitive navigation flow
 - Designed user-friendly layouts for customer interaction and accessibility
 - Focused on responsive design and smooth user experience
-

EDUCATION

Diploma in Web Development

NIIT – National Institute of Information Technology, Lagos

Aug 2023 – Nov 2024

Senior Secondary School Certificate (SSCE)

Messiah Praise International Model School – Ogun State, Nigeria

2016 – 2021
